Application Serial No. 09/868,009 Attorney Docket No. 10905.0003.PCUS00

VERSION WITH MARKINGS TO SHOW CHANGES MADE

In the Specification:

On page 1, after line 5, insert:

-- CROSS-REFERENCE TO RELATED APPLICATIONS

The present application is a National Stage of International Application No. PCT/AU99/01108, filed December 13, 1999, which claims priority to Australian Patent Application No. PP 7653, filed December 11, 1998.--

In the Claims

There are two Claim 13's, please cancel the first Claim 13. Please amend the following claims:

- 1. (Amended) A method of treatment of an existing [papillomavirus (] PV [)] infection [which includes the step of administration of PV VLPs selected from the group consisting of] comprising: administering a composition comprising (a) PV L1 VLPs [and] or (b) PV L1[/L2] VLPs and PV L2 VLPs to a patient suffering from the PV infection.
- 2. (Amended) [A] <u>The</u> method of treatment [as claimed in] <u>according to</u> Claim 1, wherein the PV infection is characterised by the presence of epithelial lesions.
- 3. (Amended) [A] The method of treatment [as claimed in] according to Claim 2, wherein the epithilial lesions are selected from the group consisting of palmar warts, planter warts, ano-genital warts, flat and planar warts of the skin and muscosal surfaces, CIN, equine sarcoid and replicating or vegetative PV infection.
- 4. (Amended) [A] <u>The method of treatment [as claimed in] according to Claim 3</u>, wherein the [PV infection is] <u>epithelial lesions are genital warts caused by HPV 6, 11, 34, 39, 41 [-44 and 51-] 42, 43, 44, 51, 52, 53, 54, or 55.</u>
- 5. (Amended) [A] The method of treatment [as claimed in] according to Claim 4, wherein the genital warts are caused by HPV 6 [and] or HPV 11.

SOLELL, PODBABED

Application Serial No. 09/868,009 Attorney Docket No. 10905.0003.PCUS00

- 6. (Amended) A method of [treatment as claimed in any preceding claim wherein the VLPs are produced by] <u>producing a PV VLP comprising: (a) cloning [the] one or more PV [L1 gene] VLP genes</u> into a [suitable] vector and (b) expressing the [corresponding conformational coding sequence for L1] <u>one or more PV VLP genes</u> in an eukaryotic cell transduced by the vector.
- 7. (Amended) [A] <u>The</u> method [of treatment as claimed in] <u>according to</u> Claims 1-5 [wherein the VLPs are produced by] <u>, further comprising:</u> cloning the PV L1 [and] <u>or PV L2</u> gene[s] into a [suitable] vector and expressing the [corresponding conformational coding sequence for L1 and L2] <u>PV L1 or PV L2 gene</u> in [an eukaryotic] <u>a host cell</u> [transduced by the vector].
- 8. (Amended) [A] The method [as claimed in] according to Claim 6 [or 7], wherein the one or more PV VLP genes comprise (i) a PV L1 VLP gene or [L1 and L2 genes are inserted into] (ii) a PV L1 VLP gene and a PV L2 VLP gene, wherein the vector is an expression vector [containing flanking sequences to form a gene construct and the resulting recombinant DNA is co-transfected with wild type baculovirus DNA into], wherein the host cell is a cell from a permissive cell line.
- 9. (Amended) [A] <u>The</u> method [as claimed in] <u>according to</u> Claim 6 [or 7], wherein the <u>permissive</u> cell line is <u>a Sf9 insect cell[s] line</u> and the expression vector is a baculovirus expression vector.
- 10. (Amended) [A] <u>The</u> method [as claimed in] <u>according to</u> Claim 8, wherein the <u>permissive</u> cell line is a procaryotic cell line.
- 11. (Amended) [A] <u>The</u> method [as claimed in any preceding claim] <u>according to Claim 1</u>, wherein the concentration of PV <u>L1</u> VLPs <u>or PV L1 VLPs and PV L2 VLPs</u> administered to the patient is 0.5-20 µg.
- 12. (Amended) [A] <u>The</u> method [as claimed in] <u>according to</u> Claim 11, wherein the concentration is 1-10 μg.

Application Serial No. 09/868,009 Attorney Docket No. 10905.0003.PCUS00

- 13. (Amended) [A] <u>The</u> method [of treatment as claimed in] <u>according to</u> Claim 11 or 12, wherein [dosages of PV VLPs are given] <u>the composition is administered</u> 3-6 times over a period of 8-1 6 weeks.
- 14. (Amended) [A] <u>The</u> method [of treatment as claimed in] <u>according to</u> Claim 11, wherein [dosages of PV VLPs are} the composition is administered 3-6 times over a period of 2-4 weeks.
- 15. (Amended) A method of immunization against HPV11 infection[s by administration of] comprising administering HPV6 VLPs to a patient.
- 16. (Amended) [A] <u>The method [as claimed in] according to Claim 15</u>, wherein <u>the HPV6 VLPs are HPV6b VLPs [are administered to the patient]</u>.
- 17. (Amended) [A] <u>The</u> method [as claimed in] <u>according to</u> Claim 15 or 16. wherein the concentration of <u>the</u> HPV6 VLPs are 0.5-20 μg.
- 18. (Amended) [A] <u>The</u> method [as claimed in] <u>according to</u> Claim 17, wherein the concentration of <u>the HPV6 VLPs</u> are 1-10 μg.
- 19. (Amended) [A] <u>The method [as claimed in] according to Claim 17 [or 18]</u>, wherein [dosages of] <u>the HPV6 VLPs are [given] administered</u> 3-6 times over a period of 8-16 weeks.
- 20. (Amended) [A] <u>The method [as claimed in] according to Claim 17 [or 18]</u>, wherein [dosages of] the HPV6 VLPs are [given] <u>administered</u> 3-6 times over a period of 24 weeks.
- 21. (Amended) A method of immunization against HPV6 infections [by administration of] comprising administering HPV11 VLPs to a patient.
- 22. (Amended) [A] <u>The</u> method [of immunization as claimed in] <u>according to</u> Claim 21, wherein the concentration of <u>the</u> HPV11 VLPs is 0.5-20 μg.
- 23. (Amended) [A] The method [of immunization as claimed in] according to Claim 22,

Application Serial No. 09/868,009 Attorney Docket No. 10905.0003.PCUS00

wherein the concentration of the HPV11 VLPs is 1-10 μ g.

- 24. (Amended) [A] <u>The</u> method [of immunization as claimed in] <u>according to</u> Claim 22 or 23 wherein [dosages of] <u>the HPV11 VLPs are [given] administered</u> 3-6 times over a period of 8-16 weeks.
- 25. (Amended) [A] method [of immunization as claimed in] according to Claim 22 or 23, wherein [dosages of] the HPV11 VLPs are [given] administered 3-6 times over a period of 2-4 weeks.
- 26. (Amended) A method of treatment of an existing [PV] <u>papillomavirus</u> infection [which includes the step of administration of PV] <u>comprising administering papillomavirus</u> VLPs without adjuvant to a patient suffering from the [PV infections] <u>papillomavirus</u> infection.
- 27. (Amended) [A] <u>The</u> method [of treatment as claimed in] <u>according to Claim [27] <u>26</u>, wherein the [PV] <u>papillomavirus</u> VLPs are chimeric.</u>
- 28. (Amended) [A] <u>The method [of treatment as claimed in] according to Claim 26</u>, wherein the [PV] <u>papillomavirus VLPs comprise E protein.</u>
- 29. (Amended) [A] <u>The</u> method [of treatment as claimed in] <u>according to</u> Claim 1, wherein the [PV VLPs include administering] <u>composition further comprises</u> an adjuvant.
- 30. (Amended) [A] <u>The</u> method [of treatment as claimed in] <u>according to Claim 29</u>, wherein the adjuvant is one that induces cellular responses.
- 31. (Amended) [A] <u>The</u> method [of treatment as claimed in] <u>according to</u> Claim 30, wherein the adjuvant[s are] <u>is</u> selected from the group consisting of (1) lipid A and derivatives, (2) Quillaia saponins and derivatives, (3) mycobacteria and components or derivatives therefrom [and] (4) IL 12, GMCSF, other Th1 inducting cytokines and (5) ozidized mannan and analogues thereof.
